

You can join the many thousands of Anodyne® Therapy Patients!

“I have been taking Anodyne treatments since March of 2005. I was in severe pain at night. After several treatments for 3 months, my pain decreased by 80%, and I got some of my life back. I now use my home unit once every 4 days, and my pain is virtually gone, and I now get a good nights sleep. I am now back as a volunteer at a local senior center about 30 hours per week.”

- J.B., Atlanta, GA

“Using Anodyne Therapy has been a miracle for me. The pain is gone and I am sleeping though the night again. I am no longer using a cane to walk and I have started driving again! I feel like I have my life back. Last month, I even went on a cruise! I feel blessed to have found Anodyne Therapy, and I would highly recommend it to anyone who has chronic pain that is affecting their quality of life.”

- R.F., Seminole, FL

“I just want to thank you. My mother has suffered from painful legs and feet for years. Nothing we’ve tried has made a difference until now. Since she started Anodyne Therapy, she has been able to completely stop the medications she was taking and finally get some sleep at night. It’s a true miracle.”

- S. M.C., Huntington Beach, CA

Make Anodyne® Therapy your choice for pain relief.

- Does your pain make sleeping, walking or exercising difficult?
- Have you given up activities like shopping or visiting loved ones?
- Do you feel depressed or hopeless?
- Do your pain medications interfere with your quality of life?

Imagine your life without pain. *There is hope...*

Although it may be hard to imagine at this point, you don't have to settle for a life consumed by pain. Since its introduction in 1994, Anodyne® Therapy has transformed the lives of many thousands of people just like you. Anodyne® Therapy can help you get back to the things that make life special. Due to decreased pain, Anodyne® Therapy patients report improved sleep, greater independence and an overall improved quality of life.

What is Anodyne® Therapy?

Anodyne® Therapy is an Infrared Light Therapy device that is applied in direct skin contact to any area of the body. Anodyne® Therapy is indicated by the US FDA to temporarily increase circulation and reduce pain, stiffness and muscle spasm. It has been prescribed and used by over 20,000 doctors and therapists who trust its clinical effectiveness. Best of all, Anodyne® Therapy is drug-free and has no side effects.

Common conditions and diseases related to poor circulation and/or pain

- Acute/Chronic Injury
- Alcoholism
- Anemias
- Chemotherapy Drugs
- Diabetes
- Poisoning from Toxins
- Prescription Drugs
- Spinal Compression/Spinal Stenosis
- Vitamin Deficiencies

How does Anodyne® Therapy work on pain?

Anodyne® Therapy works both directly and indirectly to relieve pain, and is easily applied wherever you may have pain. For patients with an acute injury or condition, Anodyne® Therapy helps to decrease pain, reduce stiffness and muscle spasm and increase circulation directly to the affected area of your body. Some chronic diseases and conditions can limit blood flow to the tiny vessels that supply oxygen and nutrients to the nerves in your peripherals - arms, hands, legs, and feet - resulting in pain. Anodyne® Therapy treatments increase circulation by dilating these vessels, which indirectly reduces pain caused by lack of blood flow.

Average reduction in pain reported in 5 studies^{1,2,3,4,5}

Will the pain stay away?

If you have an acute or temporary problem, more than likely, you will not require ongoing treatments. If you have a chronic condition causing your pain or circulatory problem, clinical treatment with Anodyne® Therapy will not be a cure, but rather an ongoing treatment for your condition. Affordable Anodyne® home systems are available for continuing pain relief in the privacy and comfort of your home.
